AMERICAN RENOLIT CORPORATION

RENOLIT EXOFOL FPX TECHNICAL INFORMATION

INFORMATION ON CLEANING AND CARE OF COMPONENTS
LAMINATED WITH **RENOLIT** EXOFOL FILMS

GENERAL

RENOLIT EXOFOL FPX films are multi-layer films with a transparent surface layer. This protects the intermediate colored layer, and in the case of wood decors, the printed layer, from adverse exposure to sunlight and weather conditions.

CLEANING

Components laminated with **RENOLIT** EXOFOL FPX film can be easily cleaned with water and a soft sponge or cloth. Contamination that is not caused by natural weather conditions should be removed immediately. If required, dilute solutions of neutral detergents, liquid soaps or window cleaning agents may also be used.

WARNING: DO NOT CLEAN RENOLIT EXOFOL FPX FILMS WITH ALCOHOL-BASED CLEANERS CONTAINING MORE THAN 25% PER VOLUME AS IT WILL PERMANENTLY DAMAGE THE FILM SURFACE!

NO USE OF ABRASIVE DETERGENTS

Such cleaning agents are not suitable for the cleaning of components laminated with **RENOLIT** EXOFOL FPX film.

NO USE OF SOLVENT-BASED DETERGENTS

The solvent of solvent-based detergents will damage the **RENOLIT** EXOFOL FPX film surface and are therefore unsuitable. This is also the case of ethanol in both its pure and slightly diluted forms.

ADVICE: Always comply with the detergent usage instructions. Do not use the detergent if there is any doubt as to its suitability. Only use neutral cleaning agents (soaps), liquid soaps or detergents in non-concentrated form that are specifically appropriate and approved for use on the plastic material PMMA (acrylic).

For additional information please contact your local **RENOLIT** representative.

This technical information sheet represents our latest state of knowledge and shall inform without obligation. The herein stated details do not release the manufacturer using our films from their own inspections and tests, which must correspond with the relevant national guidelines for its intended purposes. It is the duty of the customer to determine if the purchased product is suitable for its intended purposes.

The recipient of this information shall neither forward nor publish the content or parts of it to third parties without prior written consent of **RENOLIT**.
